Hi, I'm Aziev Hanif, an Information Systems student at Universitas Negeri Surabaya (State University of Surabaya) with a deep interest in IT management and governance. I have strong analytical skills in analyzing business needs and implementing appropriate technological solutions. I'm eager to continue learning and contributing to innovative IT projects, aiming to enhance the efficiency and effectiveness of information systems management.

Education

Universitas Negeri Surabaya - Surabaya, East Java, Indonesia

Undergraduate Information Systems, 3.73/4.00

- Relevant courses: IT Service Management, IT Risk Management, IT Audit, IS Project Management, and Data Mining.

Academic Experiences

Celerates - Independent Study

Sep 2024 - Dec 2024

Full Stack

Engaged as a mentee in the Celerates Acceleration Mastery Program (CAMP): Full Stack, focusing on both front-end and back-end development.

- Built and deployed full-stack web applications, integrating both front-end and back-end functionalities.
- Designed responsive user interfaces using HTML, CSS, and JavaScript frameworks such as React.
- Developed RESTful APIs and handled server-side logic using Node.js and Express.
- Utilized databases like PostgreSQL to implement CRUD operations and data management.
- Collaborated in an Agile environment, participating in sprints and peer code reviews.
- Learned best practices in version control using Git and GitHub for team collaboration.

A+A&Corp - Project in Information Systems Project Management Course

Aug 2023 - Dec 2023

Quality Assurance

MediSync is a web and mobile-based application aimed at serving the community in the health sector. It facilitates users in the management and monitoring of the licensing process efficiently, accurately, quickly, and flexibly.

- Conducted comprehensive testing on mobile app and website, covering over 10 test cases to ensure desired functionalities.
- Verified compliance of application and website with specifications and user requirements, using tools like Selenium, JIRA, and Postman.
- Designed, developed, and executed detailed testing strategies to meet quality standards.
- Created targeted testing scenarios to identify potential issues or bugs early in the development process.
- Collaborated with the development team to track, report, and resolve over 8 identified bugs, reducing post-release issues by 30% and improving user experience.

Work Experiences

Titian Services Indonesia - South Jakarta, Jakarta, Indonesia

May 2024 - Aug 2024

Information Technology Staff Intern

Titian Services Indonesia is a service company supporting the oil and gas sector, delivering efficient and professional technical and operational solutions.

- Monitored and maintained over 50 computer systems and network devices, ensuring 99.9% system uptime.
- Provided IT support to 100+ employees, resolving hardware and software issues with an average resolution time of under 30 minutes.
- Managed the installation, configuration, and updates of hardware and software across multiple departments, improving system efficiency by 20%.
- Implemented a new backup solution, reducing recovery time by 50% and enhancing data reliability. Conducted regular maintenance and troubleshooting efforts, minimizing downtime by 15%.
- Drafted IT policies and procedures to strengthen governance and streamline IT operations.
